

performance in academic subjects, as children find the opportunity and inspiration to use their own creativity. The programme gives children room to experiment; to work and think together; using the left and right side of their brains. They develop their own identity and self-confidence at their own level and in their own way.

Support Leonardo with your contribution

As a survey held in 2011 made clear, attention to culture, science and technology is important to the parents of children at De Burght. If we want to keep the successful Leonardo da Vinci Programme alive, we will need to raise the needed funds ourselves. Together. Year in, year out.

Stichting De Burght CT&W (the foundation that administers the programme) has a donation form ('Machtingsformulier') with different options available to support the foundation.

Please feel free to contact the Treasurer of Stichting De Burght CT&W at penningmeesterCTW@stichtingdeburghtctw.nl for more information.

Children of the World

We are preparing our children for an unknown future; for roles in society that may not even exist today. The more skills, self-confidence and independence we equip them with, the more they'll be able to enrich their own lives and those of others. They are worth it.

'Develop your senses. Learn to look carefully, and above all, recognise that everything is connected to everything else.' ~ Leonardo da Vinci
